NOTES: Read All Instructions Before Beginning Installation

- Only qualified mechanics experienced in the installation and removal of suspension components should perform this installation.
- Use of a hoist and screw jack is highly recommended and will substantially reduce installation time.
- **Installation time:** Is approximate 1/2 hour with the use of a hoist.
- **Never work on or under a vehicle unless it is properly supported.**
- **Tire Rotation:** In order to increase the life of your tires, it is recommended to rotate your tires every 3,000 miles.

FACTORY REAR BAR REMOVAL

1. Raise the vehicle up and make sure it is properly supported with safety stands. **Note: Never work under a vehicle that is not properly supported with the appropriate safety stands.**

Photo 1

2. Remove the nut that secures the end link to both ends of the OE bar. (See photo 1)

Photo 2

3. Remove the OE bushings brackets, then, remove the bar from the vehicle. (See Photo 2) **Note: The OE bushing brackets will be reused for the installation of the Eibach rear bar.**

EIBACH REAR BAR INSTALLATION

Photo 3

4. Apply some of the provided lube to the inside of the supplied bushings, then, install the new bushings onto the Eibach bar. (See Photo 3)

Photo 4

5. Install the Eibach bar into the vehicle and secure it with the OE bushing brackets and hardware. (See Photo 4)

Photo 5

6. Secure the OE end links to the ends of the bar using the OE hex nuts. (See Photo 5)

7. Make sure everything is tightened and properly positioned.
